Tg 280°C Halogen Free Laminate and Prepreg

TU-901

Core : TU-901

Prepreg : TU-901P

TU-901 Tg280 material is made of high performance robust resin system and E-glass fabric. It's a halogen free material and designed to have high modulus, thermal robust, low Dk/Df, low CTE and ultra-low insertion loss features at the same time. TU-901 laminate and TU-901P prepreg are designed to achieve high reliability multilayer, substrate, SiP, radio frequency and ultra-thin HDI boards design and applications. The product is suitable for boards that need stringent X, Y dimensional stability, low board distortion or need to experience excessive harsh environmental work with excellent signal integrity performance. TU-901 materials also exhibit superior chemical resistance, high rigidity, PCB process friendly, excellent long term reliability and CAF performance.
